July 2009 Newsletter

In the Community

Join the Adesys staff along with our co-sponsors at the 9th Annual Summer After Hours. This year's event includes Jambalaya, Po'Boys and King Cake from Liliana's and beer from Capital Brewery. Relax and visit with friends while enjoying live music by Copper Box. The Summer After Hours is Thursday, July 16th from 4 to 7pm at the Oak Bank Building (across the street from the Adesys office).

Recent Developments

Adesys recently put the finishing touches on two of our customers' new web sites. Rippe Keane Marketing created an engaging and fresh design for their new site which was coded and hosted by Adesys at www.rippekeane.com. Another customer looking to freshen up their web site and enhance their online presence is Klein-Dickert Auto Glass, who's new site at www.klein-dickert.com, connects with their customers as well as their Agent network.

Web Site Services

Adesys does more than provide outstanding hardware, software and technical support. We also provide a wide array of web site services, including design, web site and e-mail hosting, e-mail marketing and custom web based application development. This isn't anything new to us; we have been providing these services since 1997.

To discuss how our web services can help your business, please contact Tim Adamany at **608-288-0100 x104** or tim@adesys.com.

Responsible Recycling

If you have old IT equipment to dispose, Adesys has two options for you. HP will take trade-ins of old servers and printers for credit toward brand new HP equipment. Additionally, Adesys can facilitate the responsible recycling of your old IT hardware for a small charge through our local recycling partner, File 13 E-Waste Solutions. This option reclaims and recycles 98% of the material through the use of licensed and permitted facilities in the United States.

Great Products

Challenge the Status Quo. The HP Compaq 6735b Notebook PC delivers our lowest-priced, dockable business notebook PC that works just as hard as you do. Blending the latest AMD processor and integrated graphics technologies along with the HP Mobile Broadband and HP BIOS security, this package delivers a robust and secure mobile PC experience with a price and a look that will turn most heads.
